Tennessee Benefits By New Marriage Laws

Memphis, Tenn.—State Rep. J. Kennedy of Holly Springs, Miss., says Tennessee was the principal beneficiary when Miss. rid itself of its marriage mills.

Kennedy said that 21 percent of the brides married in Mississippi before the new regulations took effect last month came from Tennessee.

Many Tennessee brides were under legal age and many were acting on sudden impulse, Kennedy added. He said 59 percent of the divorces in Memphis dissolved marriages made in Mississippi.

For some circuit court clerks, in border counties where marriage was a thriving business, income from license fees has dropped off to practically nothing.

"Seventeen out of 28 circuit court clerks are suffering financial loss because of Mississippi's new marriage laws," said Kennedy, "but 66,000 parents in the state no longer have to suffer anxiety for fear their children will run off and marry in haste."

Kennedy, a 27-year-old law student at the University of Mississippi, was a leader in the fight to push new marriage laws through the last legislature.

Approximately 500,000 Children Will Be Going Back To Miss. Schools

Jackson, August 26. Approximately 500,000 children will be going back to school or entering for the first time in this state commencing in late August and early September.

In addition, the colleges of the state will accept nearly 30,000 in enrollments for the new school year.

On common schools alone, the state will spend \$48,908,707 from legislative appropriations and the local supplementary fund from ad valorem taxes will amount to \$12,000,000 for the year.

Thousands of parents and the state itself, in view of the vast outlay of funds for the education of Mississippi's most valuable asset, the children, are expected to advocate "Back-to-school" physical examinations for a great many if not all of these children.

Attention is being directed by Dr. Arlie Parks, Greenville, vice-president of the Mississippi Chiropractic Association to the fact that free "back-to-school" spinal examinations for students are being offered at this time.

The same 225 members of the association throughout Mississippi are offering this public service in memory of Dr. Daniel David Palmer's discovery of chiropractic on September 25, 1895.

Chiropractic has spread to all parts of the world in its 63 years of existence, and is now the second largest health science in the nation, legally recognized in 44 states, the District of Columbia, Hawaii, Puerto Rico, Canada and other foreign countries.

Dr. Parks states that the student enrollment figures are reported by the Mississippi Department of Education and the Board of trustees of Institutions of Higher Learning in this state are an approximate 10 percent increase in college and 5 percent hike in common school enrollments for the coming school term.

Mississippi STOCKMEN
 know "Talk is Cheap"

When a Mississippi stockman feeds, or the hurry-up help of a veterinarian, he saves a real time and money-saver. And his phone book is a money-maker when used to keep up with prices, weather, or weather — all for the stockman's benefit. The Mississippi Stockmen's Association is the only organization in the state that can help you in all these ways. Write for more information today.

THE PACE IS FASTER
BUT THE WHEEL ENDURES

The surging horsepower of the modern motor has replaced Old Dobbin. The wheel is now encased in a pneumatic tire. But the basic principle of the wheel itself remains unchanged. It is still the best means of land transportation. Likewise, we have kept pace with all the improved techniques of banking procedure. But the basic principle on which we conduct this bank remains the same, faithfully to serve the best interests of our clients.
